

## Secure the web apps of the future

Launch a career in high-tech focusing on Full-stack Development, Web App Security, and fundamentals of Cyber Security. The program is taught 4.5 months on campus, followed by a 2 months project in cyber-tech or fintech companies.

The course is designed for **complete beginners** looking to become key team players in developing the latest web applications and assuring that they are secure and safe to use by users. This training leads to a highly lucrative career path in high tech.

If you are familiar with NodeJS and JavaScript, you can join us only for the 6 weeks Python and Cyber Security training and the 2 months project.

<b>Full Stack Development</b>	3 months of comprehensive Full-Stack training See separate syllabus
<b>Python</b>	<ul style="list-style-type: none"><li>• Python</li><li>• Pycharm</li><li>• Object Orientated Programming</li><li>• Debugging</li></ul>
<b>Server Side Development</b>	<ul style="list-style-type: none"><li>• API development</li><li>• Servers</li><li>• Flask</li><li>• Caching</li><li>• Authorization</li><li>• Authentication</li></ul>
<b>Fundaments of Cyber</b>	<ul style="list-style-type: none"><li>• Cryptography and Encryption</li><li>• Computer Network security</li><li>• API Security</li></ul>
<b>Web App Security</b>	<ul style="list-style-type: none"><li>• Web Application Security OWASP</li><li>• Penetration Testing</li></ul>
<b>Industry Workshops</b>	<ul style="list-style-type: none"><li>• Industry Workshops</li><li>• Cross-team Hackathons</li><li>• Visits from Cybertech companies</li></ul>
