

Our unique teaching method and top-notch staff will help you become a Full-Stack Developer in just five months. On top of tech training, you will receive professional career guidance and personal mentorship to help you land your first position as a programmer.

The program is also focused on providing you with the most in-demand tools with a practical approach to the fascinating world of AI & Data.

You will spend 10 hours a day at the beautiful Tel-Aviv ITC campus for three months, mentored by a strong technological team from the industry consisting of Tech Leads, Tech Mentors, Tech Assistants and the program team.
