

FRONT-END DEVELOPMENT

SYLLABUS

Our unique teaching method and top-notch staff will help you become a Front-End Developer in just three months. On top of tech training, you will receive professional career guidance and personal mentorship to help you land your first position as a programmer.

The program is also focused on providing you with the most in-demand tools with a practical approach to the fascinating world of Web Design and Interactivity.

The upcoming program will be held online for 4 hours every evening and Friday morning (with the option of arriving to our beautiful Tel-Aviv ITC campus depending on the Ministry of Health's regulations) for three months, mentored by a strong technological team from the industry consisting of Tech Leads, Tech Mentors, Tech Assistants and the program team.
