

# Full Stack

## About Full Stack

Our **Full-Stack** program is a total of five months, starting with three months of intensive training at the ITC campus, followed by a five-week project in a high-tech company. As a part of the soft skills program, our students will receive professional career guidance and personal mentorship to help them land their first job.

Students will be mentored by a strong technological team from the industry consisting of Tech Leads, Tech Mentors, and the program team.

The program is a full-time, hands-on accelerator that encourages research, autonomous learning, and teamwork, while putting an emphasis on the industry's best practices and needs.

## » Programming

- Basic programming skills
- Advanced programming skills
- Debugging

## » Back End

- Node.js
- Express.js
- APIs
- Authentication/Authoriation
- Web servers
- File System
- SQL(MySQL)
- Deployment To Heroku
- NoSQL (MongoDB)

## » Testing

- Jest
- Backend Testing
- React Testing
- Unit Testing

## » Web Front End

- HTML/ CSS
- Responsive design (mobile)
- Bootstrap
- JavaScript
- React.js
- ES6
- GIT
